

**Mahedi Hasan** - London [meddz.dev](mailto:hello@medzz.dev) [hello@medzz.dev](mailto:hello@medzz.dev)

Full-stack Developer with 6 years of experience in TypeScript, React, Node.js, backend systems, and DevOps.

## SKILLS

React, Vite, Typescript, Node.js, Go, Prisma, Postgres, Docker, GCP, Pulumi, GithubActions

## EXPERIENCE

### **Lead full-stack developer** - *Playter*

Aug 2023 - Present

TypeScript, Nx, React, Prisma, Postgres, TRPC, GCP, Pulumi

- One of the first hires after the CTO, shaping core architecture as the company scaled 5×
- Led design and build of scalable fintech systems powering credit, lending, and operational workflows
- Delivered a credit risk and affordability engine integrating Experian, Heron, Companies House, and banking APIs with automated real-time data validation
- Integrated LLM pipelines to extract and structure financial data from bank statements, invoices, and credit documents, automating affordability checks, fraud flagging, and data enrichment across lending workflows
- Drove major DX and CI/CD improvements, cutting deployment time from 20 min to 3 min and full dev-to-prod cycle from 55 min to 15 min
- Designed and implemented multi-stack GCP infrastructure with Pulumi, improving stability, observability, and deployment speed across environments
- Modernized core architecture to support rapid product iteration and feature development
- Built internal tooling and generators to boost developer velocity, reduce bugs, and standardize patterns
- Mentored new engineers to maintain code quality and support rapid team growth

### **Senior Full-Stack Developer** - *Build a Rocket Boy*

Nov 2021 - Aug 2023

React, Nginx, Docker, GitHub Actions, GoLang, EKS, S3, Leaflet.js

- Delivered internal platforms supporting AAA game development, integrating frontend, backend, and cloud services
- Built real-time config and monitoring UI with dynamic JSON forms
- Created interactive mapping tools using Leaflet.js for performance heatmaps and location data

- Deployed on EKS with Docker and Nginx for static hosting and API routing
- Enhanced Go microservices for monitoring and data migrations

**Software Developer - Equals**

May 2019 - Oct 2021

- Built fintech solutions across web, mobile, and backend for business and retail clients
- Developed a hybrid PWA with GraphQL integrations
- Migrated legacy PHP app to React with Framer Motion and 3D Secure payment flows
- Delivered two React Native apps for multi-currency card management
- Built backend services and CI/CD pipelines with strong monitoring and testing coverage

**EDUCATION****City University London - BSc Computer Science**

August 2017 - August 2021

- First-class honors
