Mahedi Hasan - London **meddz.dev** **hello@medzz.dev**

Full-stack Developer with 6 years of experience in TypeScript, React, Node.js, backend systems, and DevOps.

SKILLS

React, Vite, Typescript, Node.js, Go, Prisma, Postgres, Docker, GCP, Pulumi, GithubActions

EXPERIENCE

Lead full-stack developer - *Playter*
Aug 2023 - Present

TypeScript, Nx, React, Prisma, Postgres, TRPC, GCP, Pulumi

• Joined as one of the first hires after the CTO, defining the initial architecture and engineering foundations across backend, frontend, and infrastructure.

• Architected and built Playter's core fintech platform powering credit, lending, and operational workflows, integrating Experian, Heron, Companies House, and banking APIs.

• Delivered an end-to-end credit-risk and affordability engine with LLM-powered data extraction from bank statements and invoices, automating fraud detection and financial data validation.

• Designed and implemented a Pub/Sub-based event system with replayability, idempotency, DQL, and local-first event-driven handling for payments and other workflows.

• Rebuilt CI/CD pipelines and infrastructure with Pulumi and GitHub Actions, cutting deployment time from 20 min → 5 min and full code-to-prod from 50 min → 10 min, reducing cost 4×.

• Led large-scale database and schema migrations with millions of rows and sub-minute downtime.

• Built and standardized internal tooling and generators improving developer velocity, reliability, and onboarding.

Senior Full-Stack Developer - *Build a Rocket Boy*
Nov 2021 - Aug 2023

React, Nginx, Docker, GitHub Actions, GoLang, EKS, S3, Leaflet.js

• Delivered internal platforms supporting AAA game development, integrating frontend, backend, and cloud services

• Built real-time config and monitoring UI with dynamic JSON forms

• Created interactive mapping tools using Leaflet.js for performance heatmaps and location data

• Deployed on EKS with Docker and Nginx for static hosting and API routing

• Enhanced Go microservices for monitoring and data migrations

Software Developer - *Equals*
May 2019 - Oct 2021

- Built fintech solutions across web, mobile, and backend for business and retail clients
- Developed a hybrid PWA with GraphQL integrations
- Migrated legacy PHP app to React with Framer Motion and 3D Secure payment flows
- Delivered two React Native apps for multi-currency card management
- Built backend services and CI/CD pipelines with strong monitoring and testing coverage

EDUCATION

City University London - *BSc Computer Science*
August 2017 - August 2021

- First-class honors
